

TARONJA SCHOOL BUILDING RISK ASSASSMENT.

Heath & Safety Analysis – Taronja Valencia, Spain

Important

The information contained here is provided as a support to any investigations the school wishes to undertake, prior to the group's departure. Representatives of the school should personally satisfy themselves as to the ultimate suitability of the destination, in terms of risks to the health, safety and general wellbeing of the group. We strongly urge group leaders to conduct an exploratory visit, so that they have a personal awareness of the location and are familiarized.

Health & Safety generally comes down to the use of common sense, to predict potential risks to health and safety, and to consider options to minimize, control and prevent such risks. It is important for group leaders to consider this document carefully, and establish contingency plans where feasible, based on their knowledge of the group, and the group's intentions.

Attitudes to risk management, safety procedures and legislation vary substantially from country to country. It is the duty of group leaders to familiarize themselves with these important differences.

If you have any questions, or if you wish to discuss any other issues you feel are pertinent to the correct preparation of your trip, please contact us so that we can help you further.
